AIA PESO ADVENTUROUS FUND

January 31, 2025

Fund Description

The AIA Peso Adventurous Fund (the "Fund") is a Philippine peso-denominated fund created for peso variable life insurance contracts issued by AIA Philippines Life and General Insurance Company Inc., (formerly The Philippine American Life and General Insurance Company). The Fund seeks to achieve long-term total return, which is a combination of capital growth and income with adventurous risk and at the same time minimize capital risk by investing in a portfolio of mostly equities and a small proportion of bonds. The Fund will invest in shares of Collective Investment Schemes established by AIA including Unit Investment Trust Funds (UITFs) that are managed by either AIA Investment Management and Trust Corporation Philippines (AIAIM PH) or reputable third-party investment managers.

Opinions: Any opinions expressed in this document may be subject to change without notice. We are not soliciting or recommending any action based on this material.

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value.

The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risk vary between different types of instruments. For example, for portfolios denominated in foreign currencies, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to increase or decrease. In the case of a higher portfolio volatility, the realized loss upon redemption may be high, as the investment's value may decline substantially.

In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. AIA PESO ADVENTUROUS FUND January 31, 2025

Commentary:

Market Review

Macro Update

Early-year economic data showed inflation remained on track, while GDP fell short of expectations. This opens the door for an earlier policy rate cut by the Bangko Sentral Pilipinas (BSP) to support growth.

Headline inflation settled at 2.9% in January 2025, slightly above the consensus estimate but within the government's target range of 2% to 4%. Price increases in food and non-alcoholic beverages, alcoholic beverages, tobacco, and transport drove CPI higher, partially offset by lower inflation in housing, utilities, restaurants and clothing.

Meanwhile, the Philippine GDP expanded by 5.2% y.y in the fourth quarter, below the 5.5% forecast. This brought the full year 2024 GDP to 5.6%, lagging below government's target range of 6.0%-6.5% and the second year the government failed to meet its GDP target. Growth was hindered by extreme weather events, geopolitical tensions, and subdued global demand.

Bond Market Update

In January, peso bond yields were mixed and mostly tracked US rates amid risk-off sentiment from uncertainty brought on by Trump 2.0. The curve steepened as benchmark yields in the 2-year closed at 5.79% (down by 0.25%), 5-year at 5.99% (down by 0.11%), 10-year at 6.23% (up by 0.05%), and 20-year at 6.38% (up by 0.29%).

Equity Market Update

The PSEi declined by 10% in January as foreign investors flock to US assets on the back of Trump's US exceptionalism policy, weak PHP and market impact of PCOMP rebalancing.

- New PSEi constituents carry higher weights (CBC 3%, AREIT 1.4%) causing downgrade of remaining members.
- Despite US dollar weakening, PHP failed to strengthen as market speculates an eventual break of the P59 resistance.
- Risk-off was apparent as high-dividend yielding names (TEL, LTG, GLO) are among top gainers MTD.
- MTD foreign outflow = USD114m

Positioning, Outlook, and Strategy

Performance: The AIA Peso Adventurous Fund lost 5.19%, gross of fees in January. Its higher exposure in the equity fund which outperformed during the period, boosted fund returns.

Positioning, Outlook, and Strategy: Stable inflation and resilient economy provide a positive backdrop for fixed income. Inflation is expected to stay well-anchored to the central bank target of 2% and 4%, with the BSP likely to continue cutting rates this year to help boost the economy. However, volatility is expected to persist as risks to the outlook remain amid higher wages, utility rates, and uncertainty on US policies.
